

Full Stack Software Engineer - Job Description

Duality Technologies is hiring a full-time Full Stack Software Engineer for our Tel Aviv office. Typical responsibilities include designing efficient solutions integrating our proprietary encryption technologies into a production data science environment. Successful candidates will take a significant part in the development of the enterprise-grade software product, which enables collaboration on encrypted data via the distributed data processing.

Required Skills / Experiences

- Proven experience as Full Stack Software Developer (3 years, at least):
- Server side: Python (or other object-oriented server-side language)
- Client side: HTML5/ReactJS/CSS
- Very Good Knowledge of Linux OS
- Understanding of Object-Oriented principles
- Strong ability of self-learning and independent problem solving
- Fluency in English
- Bachelor's degree or higher in Computer Science or Computer Engineering
- Additional Skills / Experiences:
- Experience in parallel and distributed computations
- Experience in resource consumption and performance optimization
- Practical DevOps experience, familiarity with Docker containers
