

Head of Product Management - Job Description

Duality is a well-funded start-up in the space of privacy, data science and cryptography. We are looking for a creative and passionate Head of Product Management to join our growing team and bring fresh ideas and innovative thinking.

The Head of Product Management will be responsible for product planning and execution throughout the product life cycle.

Responsibilities

Play a key part in designing and implementing the product roadmap for Duality's platform and products, with responsibility for the entire product life cycle from strategic planning to tactical activities and customer engagements.

Partner with our Research and data science teams to deliver a world-leading secure computing platform, that enables top ran data science on encrypted data, serving customers across all industries (Financial, Health, Insurance, Automotive, Retail and more.).

Work closely with product marketing, sales and sales engineering on customer's requirements and use your analytical skills and deep product and market understanding to identify new market trends and opportunities.

Requirements

- 6+ years of relevant experience as a leading product manager of a software enterprise product
- Proven track record of managing all aspects of a successful product throughout its full life cycle with an advantage to enterprise-grade, B2B products
- Strong technical background with an advantage in AI, privacy or security technologies
- Outstanding analytical skills, experience with data-driven decision-making
- Excellent communication and presentation skills in English
- A team player with great interpersonal relations
