

(Senior) Software and Data Engineer

Duality is a well-funded B2B tech start-up in the field of data privacy, offering data collaboration solutions for enterprises in the financial services, pharmaceutical, telecom sectors, and more. We are hiring a (Senior) Software and Data Engineer who will take an essential part in all aspects of Duality's SecurePlus product development.

Key responsibilities:

- Lead technology by mentoring, introducing best practices, performance optimization, security considerations and more
- Develop Distributed System Architecture
- Design and develop user interfaces, API and SDK
- Design and develop server side and integrations with data processing systems
- Design and develop components in distributed data processing systems
- Deliver high-quality code with excellent automatic test coverage

Requirements:

- **Vast experience (5+ years) in backend processes (data pipelines and workflows)**
- Good understanding of Data Science principles (statistics, ML, etc.)
- Previous experience with Python, Databases, Linux
- Experience with backend test automation tools (not necessarily UI based)
- Analytical and problem-solving skills
- B.Sc. in Computer Science / Software Engineering or equivalent
- English - high level, verbal and written

Desired Skills:

- Experience with Data Science tools / frameworks / platforms
- Familiarity with CI/CD methodologies
